

BARLETA

PRECISION MANUFACTURING INC.

Precision parts provider for aerospace

AS9100 and ISO 9001 certified since 2015

Barleta Precision Manufacturing Inc.

Barleta Precision Manufacturing Inc. is a producer of high-quality machined parts that meet global aerospace standards and client specifications. With a proven track record across the aerospace, automotive, industrial and medical sectors, our parts are engineered with precision and reliability.

As an AS9100-D and ISO 9001:2015 certified company, we are committed to delivering consistent quality, on-time delivery and exceptional service.

Over 20 years of experience in exporting to the aerospace market

The company started out as C.C. Barleta Machine Service Center, Inc., in the late 60s. It was a humble machine shop focusing on automotive-engine-rebuilding services and small-batch metal fabrication projects.

The company expanded to another HQ located in Sucat, Parañaque to cater to more customers and clients in the southern portion of Metro Manila.

In 1990, the company started investing in CNC machines. The combination of an innovative machining process and a dedicated team paved the road for C.C. Barleta to become one of the first Filipino-owned companies committed to aerospace manufacturing for export.

In 2014, with the company's continued growth, Barleta Precision Manufacturing, Inc. was formed to fully serve the company's export market.

The company moved headquarters to LISP III in Santo Tomas Batangas and acquired their AS9100 and ISO 9001 certification in 2015.

We are a world-class machining solutions provider.

AS9100 and ISO 9001 certified since 2015

This ensures we meet the highest quality standards in aerospace manufacturing. We successfully renewed our certification on May 12, 2024

Extensive lineup of the latest CNC machines

We have acquired state of the art CNC milling, turning and lathe turning machines for utmost manufacturing precision.

High-quality parts made for global export

Every customized part is carefully processed and meticulously inspected. We cater to clients with specific machining needs all over the world.

Our Products

BPMI specializes in the production of critical metal and plastic components, using a wide range of materials including various grades of stainless steel, aluminum, carbon steel, plastics, pre-hardened steel, and steel castings.

We can cater to clients' specifications, from simple machining to complex engineering.

AUTOMOTIVE

INDUSTRIAL

MEDICAL

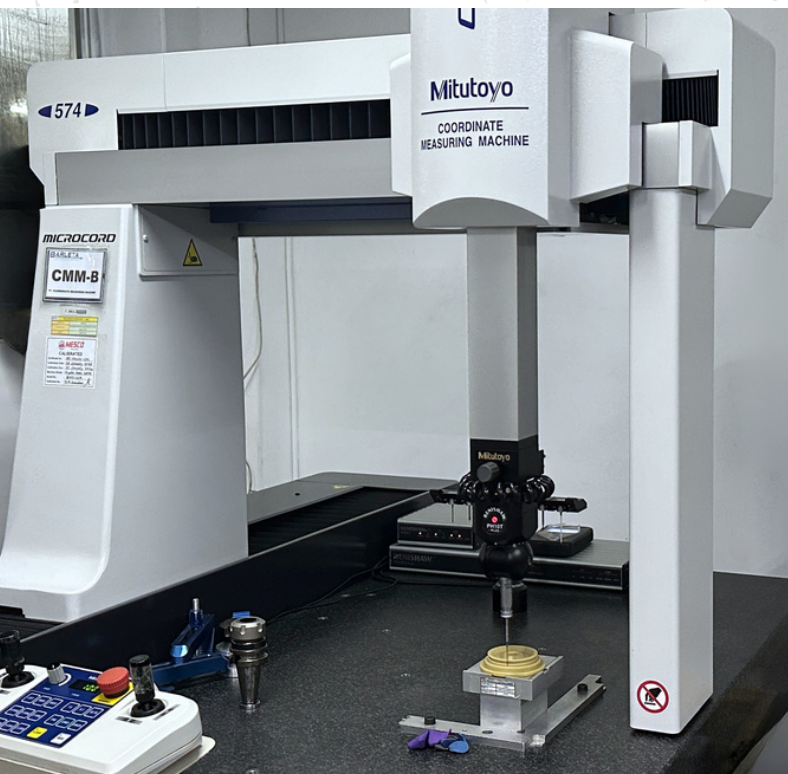

CNC Milling Machines

BPMI currently has milling machines from trusted global brands such as Mazak, Chevalier, and Tsugami.

CNC Turning Machines

Mazak's world-class turning centers aid in the manufacturing of BPMI's metal products.

CNC Coordinate Measuring Machines

BPMI uses high precision measuring machines to guarantee that we cater to the stringent regulations and standards of the industry.

Quality, on-time delivery and service

BPMI has a diverse range of clients that we are currently supplying to, most of which belong to different sectors of the aerospace, medical, and energy industries from all over the world.
